eligibility5010

Testimonials

Midnight Sun Computing, L.L.C

"*Glade Run Lutheran Services* purchased and began to use Eligibility5010 about 10 years ago. Since implementing this software we have saved paper, thousands of staff hours, and improved the accuracy of our eligibility verification due to the reporting capabilities. We have been able to work with the developers to customize reports to our needs. The developers are quick to respond to any changes in eligibility reporting, and are also forward thinking, anticipating changes and upgrading the software." Jayme Glover, Director of Information Systems, 9/16/2014
"Eligibility5010 is state-certified PA PROMISe MA eligibility software that we have implemented with various county government agencies and behavioral health providers, and will continue to do so.

We believe it is a mistake to *not* use a batch software for client reporting – and Eligibility5010 is efficient, cost-effective, comprehensive, flexible, and upgradable. It is a time-saver, and quite possibly a life-saver." Mark Alter, Data Analyst **Southwest Behavioral Health Management, Inc**. 9/12/2014

"We use the Eligibility 5010 product to run daily Eligibility Verification checks. It enhances and nicely compliments our current Clinical Billing Software. The eligibility database has helped to increase work productivity by providing an outlet that promotes better time management. The staff from Midnight Sun Computing are excellent to work with and have made this process run smoothly for our organization." – *Jackie Jogun Administrative Supervisor Adelphoi Village*

". I would not hesitate to recommend your product to anyone that I come across who needs to track and verify changes in eligibility status in a batch process, or simply verify coverage" Neal Byrnes, IT Systems Administrator, **New Directions Treatment Services**, Work 610.758.8011 x120 Cell: 610.417.2167 nbyrnes@ndts.org

eligibility5010

Eligibility5010 is a reporting add-on tool designed to work seamlessly with your E.H.R. Reports present data from PA Promise in response to a request for the eligibility status for all agency consumers.

Each report adds a perspective that supports a different management task. The reports were developed in collaboration with office staff managing consumers receiving mental health, physical health, drug and alcohol, and children and family services.

Save time and minimize frustration with a comprehensive, reliable tool that details upcoming and retroactive status, changes and retroactives. Detailed reports include consumer deductibles, co-pays and co-insurances. The reports are *auditable* and *verifiable*.

Protect your consumers: 2.3 – 2.5% of the active agency consumers are up for renewal every month - two consumers for every 100 open clients in your agency. *Help* your consumers *keep their benefits by working with them to stay current.* How? At the beginning of a month, print the **eligibility5010** report on the consumers who are scheduled to lose MA Service benefits during the month, and pass the list onto your case managers. They can schedule an appointment with the consumers to file the required paperwork.

"The last thing I remember is being thrown into the dryer."

Midnight Sun Computing, L.L.C

Know which payer to bill:

Proactively track changes in *MCOs, third party liability* and *Medicare Part A* or *B before the service is rendered*. Quick review of change reports is easy and focusses attention on those consumers who have changes in coverage: *this results in fewer rejections.*

Run comprehensive EVS reports on selected consumer groups (e.g. by service or status) to organize your tasks:

Identify and verify Retroactives. Midnight Sun Reports can check retroactives

Check the status of Self-Pay consumers. Many consumers who present as Self-Pay have medicaid coverage. Run reports against aging accounts to find them.

Prepare for appointments: Print out eligibility for all appointments, including outpatient appointments.

Midnight Sun Computing is known for timely updates in response to state wide changes. When implementation details are available for the

forthcoming Pennsylvania Medicaid Expansion we will be ready with reports. The projected date for implementation is January 1st, 2015.
