

Midnight Sun Computing: Eligibility 5010 News

PA Promise Certified for 270/271 batch
EVS processing since 2003

9/15/2013

[Edition 1, Volume 1]

What is Eligibility 5010? A comprehensive batch EVS application providing Client change reports; reports of inactive clients, reports of rejected clients (bad data) and comprehensive reports of the eligibility status of all clients

Pennsylvania PA Promise EVS Reporting

In January 2013, PA Promise began adding co-pay, co-insurance and deductible data to the EVS data. Print reports with or without the new data.

HINT:

Request the whole month and the change reports give you forewarning of pending MA Service termination.

Eligibility5010 evolves during the year:

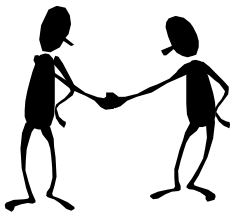

- Responsive to changes initiated by PA Promise
- New reports
- Optimized code
- ODBC connectivity
- DB Management tools
- Collaborations

With Upgrade Assurance, an agency has immediate access to support and updates.

New Agencies:

Area Agency on Aging

Area Agencies on Aging monitor clients as they move residences. An AAA agency is using change of status reports to track this

A new D&A client wrote: "I would not hesitate to recommend your product to anyone that I come across who needs to track and verify changes in eligibility status in a batch process, or simply verify coverage. "
