

# Midnight Sun Computing: Eligibility 5010 News

PA Promise Certified for 270/271 batch  
EVS processing since 2003

4/20/2014

Edition 4, Volume 2014

*What is Eligibility 5010? A comprehensive automation solution with batch reporting  
Of PA promise EVS and Staff Exclusions (LEIE, SAM and Medichex databases)*

## New Client EVS reports

“Month | Month” is a single report that includes gains and losses of

- MCO Behavior Health
- MA Service (excluding minor changes and MHX)

Month | Month replaces the set of four (4) single reports that are now run at the beginning of the month.

The Client History format is used to provide context. An associated minimal report is a simple list of changes.

The original reports will stay in place until the next release so you compare results against the new report.

**ExclusionDBD add-on:**  
Compares your staff/business associates to the federal and state Exclusion/Sanction databases).

## Windows 8, 8.1:

Some fonts were replaced in order to display well in Windows 8.1.

## New initiatives underway:

- ✚ Automate of the task of sending & receiving batch files from the BES web site.
- ✚ Add real-time EVS checks of individual clients or small sets of clients

Eligibility5010 responds to changes initiated by PA Promise and to client requests. Upgrade Assurance ensures that agencies have immediate access to support and updates within hours.
